

```
" Go back and forward with Ctrl+0 and Ctrl+I
" (make sure to remove default Obsidian shortcuts for these to work)
exmap back obcommand app:go-back
nmap <C-o> :back
exmap forward obcommand app:go-forward
nmap <C-l> :forward
```

```
exmap back obcommand app:go-back
nmap <C-o> :back
exmap forward obcommand app:go-forward
nmap <C-l> :forward
```

```
exmap dailyNotes obcommand daily-notes
exmap dailyNotesGotoPrev obcommand daily-notes:goto-prev
exmap dailyNotesGotoNext obcommand daily-notes:goto-next

nmap <Space>nn :dailyNotes
nmap <Space>np :dailyNotesGotoPrev
```

```
exmap wiki surround [[ ]]
map [[ :wiki
```

Vim key bindings

Allows you to use Vim key bindings when editing.

Confirm entering Vim mode

Vim mode is for efficient text editing but can be quite counter-intuitive. If you're not familiar with Vim, this option might make it look like Obsidian has stopped working.

To verify that you know your way around Vim, please enter the command to quit Vim without saving below:

Your answer

Let me enable Vim
